## teachers of tomorrow

The Teachers of Tomorrow Online Meeting took place on the 8<sup>th</sup> of June 2021 and saw project co-ordinator Jürgen Will give an overview of the project. Teachers of Tomorrow is a 2-year Erasmus+ project that develops an innovative competence profile for teachers and develops new future-oriented methods as well as teaching and learning materials/tools. The meeting was attended by all collaborating partners from Austria, Germany and Italy, including EU project co-ordinator Dr Kristin Brogan, MTU's Sheila O'Mahony and Noleen Dooley of WIT (Waterford Institute of Technology). Each partner had a representative to introduce each organisation involved in the project. This was followed by a presentation of workshop activities produced by partners. Finally, the meeting was adjourned with a Question-and-Answer session.

## TOTO - Teachers of Tomorrow

The transformation of the educational world and the world in general requires that teachers become empowered to recognize their role as active actors in sustainable teaching and learning. They should reflect on their own value system. The future social and educational framework conditions will change based on a new reflection of the value system and the globalization of education. The project will focus on the practical implementation and evaluation of practical pedagogical work with teachers and learners.

### Target groups:

Adult education teachers in regular schools, educational counselling centres, coaching area and teachers with a migrant background.

### Our aims with TOTO

The project relies on an interdisciplinary and transdisciplinary approach. It is a project of science, society and practice that is closely linked to the process of the European Union. It is about a high-quality qualification of teachers and the socio-cultural and emotional participation and part of marginalized groups in society in the educational process, a dialogue-based, systematic knowledge transfer.
